

KED POP

First of a new generation of children's helmets.

With the fully integrated Mips® Brain Protection System and latest Inmold technology, KED® defines a new high-end protection level for children's helmets. POP kids can also enjoy an extremely high level of wearing comfort. The precise K-FIT adjustment system allows children to easily fine-tune the fit of their helmet. The integrated rear flashing LED light ensures maximum visibility in road traffic. The high-quality and moisture-absorbing microfibre lining keeps the head pleasantly dry. And intelligently designed ventilation ensures optimal air flow even in high temperatures. The design of the helmet shell guarantees an optimal balance between lightness and impressive shock absorbency capabilities. Whether they're on the road or taking their first spin in a bike park - with a POP, kids are well equipped.

TOP FEATURE // Mips®

The EPS inner shell of KED helmets provides maximum impact absorption in the event of a fall. The Mips® Brain Protection System integrated into the helmet shell provides additional protection for the brain in the event of an oblique impact angle. The rotational forces acting on the brain in this case can cause brain damage. The low-friction shell of the Mips® Brain-Protection-System allows a sliding of 10-15 mm in all directions in case of oblique impact angle. The rotational forces acting on the brain can thus be efficiently reduced.

K-FIT

With the compact K-FIT system, we have developed one of the most comfortable systems currently available. With the rotary wheel, a precise adjustment is made in both directions of the head ring, which is also adjustable in height. K-FIT combines active and passive visibility thanks to integrated rear reflector and switchable LED rear light with continuous and flashing mode.

When publishing in print media, we would be grateful if you would send a copy of the document to D-H-G Knauer GmbH in Freiberg am Neckar. When publishing in online media via a URL, please send an e-mail to: presse@ked-team.de. Thank you very much!

AT A GLANCE:

- integrated MIPS® Brain Protection System
- Inmold technology
- raster lock
- K-Strap distributor
- 8 ventilation openings
- EN 1078 approved
- Sizes (cm): 48-52 (S) , 52-56 (M)
- Weight (g): 240 (S) , 260 (M)
- Colors: black white / white blue / white magenta / purple skyblue / pink / blue / iceblue white / petrol orange / lilac green / grey
- RRP: 69,95 Euro
