Product Description

Brück & Sohn Kunstverlag - Christmas folding card "Erzgebirge workshop"

Our Christmas Folding Card with the view into a cozy carver workshop in the Erzgebirge delights all lovers of the Erzgebirge folk art. It shows a tire turner at work. The craft of the tire turning was developed around 1800 in Seiffen in the Erzgebirge and is still an integral part of the Erzgebirge folk art. The tire turner works a piece of wood on a wooden lathe so that a wooden tire with the profile of the desired figure is created. From these figures, toys are made or they are the equipment of Christmas pyramids. The greeting card with the Erzgebirge workshop is a real Christmas card for all your friends, acquaintances or business partners.
