Product Description

CAPPА Adjustable Double Curtain Rod, 305-457 cm with metal finish

Umbra Cappa double curtain rod is a modern, extendable telescopic curtain rod made of metal, including wall bracket, fixing material and end pieces.

Windows are an essential part of your home and can make a big difference to the appearance of a room by adding attractive curtains or drapes. But to make them look really good, you need a curtain rod that matches the curtains or drapes you have chosen and fits in with the room décor without being too dominant.

Unlike cheaply made rods that tend to bend or warp over time, each Cappa double curtain rod from Umbra is made of high-quality metal and individually checked for quality assurance. Sturdy and designed to support a variety of window fashions including light to medium weight curtains with a max weight of 10 kg. Plus, everything you need to get it set up fast comes in the box including matching metal finials, adjustable wall-mounted curtain rod brackets, screws, drywall anchors and easy-to-follow installation instructions.

Umbra is an internationally operating design company known for original, modern, cool, functional and affordable products for home & living.
