Product Description

An icy look in a cosy, warm environment - this is how VAL enchants its viewers right away. Functionally, too, both vessels know how to shine regularly as lanterns or, in the tall form, alternately as vases. After the overlay glass has been manufactured, the pleasantly natural impression is finally created by skilful hand-cutting. And also, in case it has already been mentioned somewhere, somehow, sometime: Art still comes from ... yes, yes, you know!

- Material: hand-cut flashed glass
