### Product Description

FROID inevitably sounds like joy, and that's exactly what happens as soon as the ingenious wine cooler appears at the table. The double-walled design takes over the main task and keeps bottles of all kinds cold. But it is with the wine that the real treat comes into play in the form of the cork holder. Not only at home, but also in restaurants, the closures of older vintages are proudly presented. In contrast, the handcrafted, spherical shape has long since arrived in the modern age.

Caution! Not suitable for children under 36 months.
