from **34,60 EUR**

Item no.: 374707  
shipping weight: 0.30 kg  
Manufacturer: dantoy

### Product Description

A real plant and play set in one, with which children can give free rein to their green fingers and let vegetables sprout and grow. The set is suitable for playing and learning, both with live plants and the corresponding vegetables. The set contains plant labels that help to memorise what has been sown where. There is also a sheet of labels that the child can draw or write on and then stick onto the plant tags. This set offers great play value as it can be used for growing plants, as a pegging toy or as a play set with different toy vegetables. This toy can easily be expanded with other sets from the Green Garden series, all of which encourage outdoor play, learning and exploration. Combine the mini greenhouse set with the plant set so that even more things can sprout. The Green Garden universe invites you to playfully engage in many of the everyday tasks associated with caring for a garden and vegetable garden. Discover together how the plants and colours of the garden change throughout the year. This mini greenhouse set is a Danish-made toy from dantoy, made from plastic that carries the Nordic Ecolabel. The set consists of 18 pieces in the beautiful, calm colours of Green Garden. The recommended age group for this product is 2+ years.
