Manufacturer: KED Helmsysteme

## Product Description

Rayzon M, white

There can be no doubt that the helmet is by far the most important part of a cyclist's equipment. Reason enough to concentrate on one central task: developing and producing optimal head protection systems.

Bicycle helmet with maxSHELL(R) technology, K-Fit adjustment system, QUICKSTOPP(R) strap length adjustment and lock, K-Lock, 18 ventilation openings and tested according to EN 1078.

- MAXSHELL(R): Apart from helmets with Inmold technology and the MIPS system, we also offer helmets using the maxShell(R) process, which are produced exclusively in Germany. The maxShell(R) technology provides an increased elasticity of the bond between the helmet's top shell and its down shell, which has a positive impact on the shock-absorbing properties.
  - K-FIT: With the new K-FIT system, we have developed one of the most modern and lightest adaptation systems with integrated mono-LED. Thanks to both the reflector and the flashing LED, K-FIT combines visibility with precise, finely-gridded adjustment in both rotational directions and reliable locking in the selected position.
  - QUICKSTOPP(R): Our QUICKSTOPP system at the center top of the helmet allows quick length adjustment of the strap and prevents uncontrolled sliding of the strap from one side of the head to the other.
- Colour: white
  - Size: M (55 cm - 59 cm)
  - Weight: 270 g
  - Certificated EN 1078
