Product Description

POP Mips S lilac green

POP - the first of a new generation of children's helmets. With the fully integrated MIPS® Brain Protection System and state-of-the-art Inmold technology, KED® defines a new high-end protection level for children's helmets. POP Kids can also look forward to super comfortable wearing.

The finely grated K-FIT adjustment system makes it child's play to fine-tune the helmet. The integrated flashing LED rear light ensures maximum visibility in road traffic. The high-quality, moisture-absorbing microfibre lining keeps the head pleasantly dry. And the intelligently designed ventilation ensures optimum ventilation values even at high temperatures. The design of the helmet shell guarantees the optimum balance between lightness and very good shock absorption values.

We have specially adapted the newly developed HSL EPS inner shell to the ergonomics of children's heads. It is not simply a reduced inner shell from the adult range. The inner shell ensures safe shock absorption in the event of a fall or impact with obstacles. The so-called inmold manufacturing process guarantees a durable and stable bond between the inner shell and the outer shell. The peak is not only a design feature but also protects the temples and forehead area. An extended protection zone at the back of the head rounds off the safety package.

Whether on the way to nursery or school, the first trip to the bike park or the bike tour with parents - the start into mobility on 2 wheels can look very different. Falls are also part of learning to ride a bike and are experiences that help the children with proper self-assessment. The safety concept of the POP meets all these situations and defines a new level of safety.

- Inmold technology
- Fully integrated MIPS Evolve Brain Protection System (BPS)
- Ventilation system with 8 vents
- Quick-drying, washable microfibre inner lining
- K-FIT adjustment system with LED flashing light with 2 additional reflectors
- Ratchet buckle with chin pad
- Soft webbing with K-Strap Holder
- tested according to EN 1078
- Size: S (48 cm - 52 cm)
- Weight: 260 g
