Product Description

NOIR IS NOT A PROGRAMME. IT'S A PROMISE The asymmetrical look is by no means a coincidence, but rather deliberate. Creative freedom, away from the precisely measured uniform monotony. In addition, a marvellous pleated look, which is mainly responsible for the fascinating play of light on the surface. The glass vases, skilfully shaped by hand, are coated in matt black and form an exciting contrast to the bouquet of flowers. There is no question that vases are made for flowers. But even in the absence of floral elements, each vase causes a stir as a sculpture. WITH AND WITHOUT There is no question that vases are made for flowers. But even in the absence of floral elements, every vase causes a stir even as a sculpture. BENT AND BALANCED by no means. Rather asymmetrical and that is exactly what is intended. Creative freedom, away from the precisely measured uniform monotony. LIGHT AND SHADOW The pleated look is mainly responsible for the fascinating play of light on the surface. And where there is shadow, there is also light
