## GB SAND & WATER SET 80 PARTS

**117,56 EUR**

Item no.: 374737  
shipping weight: 9.70 kg  
Manufacturer: dantoy

### Product Description

Large, robust sand and water set made from plastic scraps. A versatile set with many elements ranging from ships and wheelbarrows to shovels, moulds and buckets. It offers many possibilities for playing with sand and water outdoors. A perfect set for facilities with lots of children playing, which strengthens children's fine motor skills and imagination, among other things. The Green Bean sand and water set is made from recycled plastic that is left over from the production of other dantoy toys. These leftover materials are given a new lease of life instead of simply ending up as waste. The Green Bean range is therefore 100 per cent sustainable. Due to this recycling process, the colours vary from set to set and have different, iridescent textures and shades. This sand and water set is a dantoy toy made in Denmark from recycled plastic that carries the Nordic Ecolabel. The set consists of 80 pieces in beautiful colours, which may vary slightly due to the production process. The sand and water set from Green Bean, the green series from dantoy, consists of numerous elements that offer many opportunities for imaginative role play and exploration in nature with sand and water.
