235008 - Radius pillar candle holder L

from **35,01 EUR**

Item no.: 395965
shipping weight: 0.50 kg
Manufacturer: Philippi Design

Product Description

RADIUS pillar candle holder
PURPOSEFUL: Despite its simplicity, there is of course one detail that should not be missing - the small spike in the centre of the candle plate centres block candles, regardless of size, and prevents them from slipping during transport.
RENAISSANCE: The simple shape, which also manages the feat of taking a leap back to the Middle Ages, is strikingly (and not entirely coincidentally!) similar to the night lights from times gone by
REDUCE TO THE MAX: For a radius, you always need a circle (sometimes two) and there you have the simplest shape in the universe. A candle holder could hardly be more minimalist, timeless and elegant.
