Manufacturer: Philippi Design

Product Description

LUXOR lantern
A WARM WELCOME: The impressive LUXOR lantern is equipped with a practical carrying handle and is available in two sizes. A warm invitation as a decorative object at the front door or as a source of light on the patio or balcony.
STANDS LIKE 'NE ONE': The voluminous construction ensures stability and can hold several altar candles at once, providing all kinds of illumination on long summer evenings.
SAFETY FIRST: The toughened safety glass is guaranteed not to burn anything, as is the straightforward architect-style look.
ARCHITECT-LOOK LANTERN
What distinguishes the lantern from a wind light is essentially the handle for hanging or the handle for transporting. LUXOR fulfils the latter task with flying colours. The voluminous construction ensures stability and holds several altar candles, which provide all kinds of illumination on long summer evenings. A warm invitation as a decorative object in front of the front door or as a light source on the patio or balcony. The toughened safety glass is guaranteed not to burn anything, as is the straightforward, architect-style look.
