235007 - Radius pillar candle holder S

from **30,75 EUR**

Item no.: 395964
shipping weight: 0.30 kg
Manufacturer: Philippi Design

Product Description

RADIUS pillar candle holder
RENAISSANCE: The simple shape, which also achieves the feat of taking a leap back into the Middle Ages, is astonishingly (and not entirely coincidentally!) similar to the night lights from times gone by
REDUCE TO THE MAX: For a radius, you always need a circle (sometimes two) and there you have the simplest shape in the universe. A candle holder could hardly be any more minimalist, timeless and elegant.
PURPOSEFUL: Despite its simplicity, there is of course one detail that should not be missing - the small spike in the centre of the candle plate centres block candles, regardless of size, and prevents them from slipping during transport.
