Item no.: 334023

shipping weight: 1.00 kg

Manufacturer: J.Tiedemann Manufaktur & Design

### Product Description

Kite flying - Wind chime made of stainless steel

The company J.Tiedemann Manufaktur & Design has been producing figures and sculptures made of stainless steel for house, terrace, balcony and garden in Germany for about 15 years. The wind chime turns and swings in all directions, even in light wind and with stronger wind the movements remain gentle and graceful. The stick is divided in the middle for plugging together. If the wind chime on e.g. the balcony is to serve as decoration, only the upper part can be used because of its height. The surface of the material is dirt-repellent treated, rust and weatherproof.

The dimensions are: Wind chime= height 180 cm, width 80 cm; figure with kite= 25 cm high; stainless steel balls= 60, 100 mm
