Product Description

Charlotte, the fisherman - bird of stainless steel and natural stone, stainless garden decoration (90 cm)

Stainless steel leaves no rust stains on the stones of the terrace. The figures are water, rust and frost resistant. In an elaborate process the surface of the material is hardened and treated to be dirt-repellent, so that the sculptures have a long life. If after many years the material becomes matt, it can be easily repolished with stainless steel cleaner. The figures will have small deviations from the shown unique pieces, because they are handmade. Through years of experience the quality is always the same. We obtain the most beautiful hand-picked stones from many parts of Europe. No stone is like the other in shape and colour.

The company Tiedemann Manufaktur und Design was founded in 1985 and has been producing figures and sculptures for house, terrace, balcony and garden for about 15 years. All articles are produced exclusively in Germany and leave the manufactory after careful examination. This company has made it their business to deliver the best quality and the most beautiful design at a good price.
