215007 - Cuculo cuckoo clock

from **87,67 EUR**

Item no.: 395963
 shipping weight: 0.60 kg
 Manufacturer: Philippi Design

Product Description

CUCULO cuckoo clock
CUCKOO CLOCK, DIFFERENT: The emancipated bird of the world has laid claim to its own dwelling, strictly separated from the clock and hands.
RESTORED: After a thorough renovation, the wooden hut has given way to two maximally purist housings made of chrome-plated steel. From the Black Forest straight to the penthouse. Welcome to the modern age!
THE TECHNOLOGY HAS A BIRD: The clockwork is silent, and for a change it also works without a tick-tock. Batteries replace the obligatory pine cone weights - there's no longer any need to wind the clock (which is constantly forgotten).
ATTENTION, IT'S BEEPING! Cuckoo clocks are no longer what they used to be. That's a good thing! The emancipated bird of the world has laid claim to its own home, strictly separated from the clock and hands. After a thorough refurbishment, the wooden hut has given way to two maximally purist chrome-plated steel housings. The clockwork is noiseless, and for a change it also works without ticking. Batteries replace the obligatory pine cone weights - winding the clock (which is constantly forgotten) is no longer necessary. Hanging on the wall or alternatively standing on the table, one thing has remained the same: It chirps once an hour. There has to be that much bird! And thankfully, depending on the setting, it can also be switched off at night. Then there's peace and quiet in the box.
Modern cuckoo clocks: Tradition meets contemporary design. Cuckoo clocks are classic timepieces that are experiencing a renaissance in modern designs. These clocks combine the traditional charm of the hourly chirping cuckoo with contemporary materials and functions. Chrome-plated steel models in particular offer an elegant and durable option for any interior. Modern cuckoo clocks are characterised by purist design and innovative technology. A silent movement ensures a quiet environment, while the cuckoo can also be switched off if desired. These clocks are battery-operated and offer the flexibility to be used either hanging on the wall or standing. These clocks are not only functional timepieces, but also stylish decorative objects that add an elegant touch to any room. They are perfect for modern interiors and bring a harmonious combination of tradition and modernity. To summarise, modern cuckoo clocks offer a perfect combination of classic charm and contemporary design. They are a must-have for anyone who values stylish and functional decoration.
