from **44,87 EUR**

Item no.: 397010
shipping weight: 4.00 kg
Manufacturer: NEXTIME

Product Description

NeXtime Atomic (35cm) is a radio-controlled wall clock, also called atomic clock, that sets itself to the correct time when there is a daylight saving adjustment. The clock has a white dial with a combined black index (numbers, stripes and dots), making it easy to read the time. The radio signal is sent from Frankfurt and only works for the Central Europe time zone GMT + 1 (CET). Product specifications:- Material: Dome Glass- Clock type: Wall clock- Color: White or Black- Size: Ø35cm- Battery type: 1x AA battery, not included- Movement: Radio Control movement
