650007 - 3D craft kit Stegosaurus (MQ6)

from **8,70 EUR**

Item no.: 392096
shipping weight: 0.20 kg
Manufacturer: Eugy

Product Description

Stego's tail spines, called thagomisers, can grow up to 90 cm long! They flailed them around to protect themselves from predators. Their distinctive dorsal plates have also been a hot topic of discussion with conflicting views on whether they are merely aesthetic or fulfil a certain function! Good for nature AND for you! EUGY not only encourages creativity, but is also environmentally friendly. So go ahead... bring your wild! We have won a Red Dot Award! The Red Dot is the award for high design quality. Only products that are characterised by outstanding design are awarded the coveted seal of quality by the international jury. Our core values are goodwill towards nature and life, refined quality and beautiful design. We are delighted that our beautiful design has now been recognised by a prestigious international design award, the Red Dot. Our products comply 100% with international safety standards (EN71-1,2,3 and CPSIA). An EUGY pack contains 7 flat cards with individually numbered parts that you can assemble yourself.
